AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

In response to the Office Action dated July 12, 2001, please enter the following amendments and consider the following remarks. A page showing the requested changes is attached.

IN THE SPECIFICATION:

Replace the paragraph beginning at page 2, line 17 with:

B
However, in the photo resist film described in Japanese Unexamined Patent Publication No. 273925/1994, there was not sufficiently investigated filling of fluorescent substance into the cell. On the other hand, in the process considering the filling described in Japanese Unexamined Patent Publication No. 69339/1997, the filling amount of fluorescent substance into the cell was secured, but the fluorescent substance was not fixed uniformly and efficiently in a side and bottom wall of the cell (filling up property), since the photosensitive resin composition layer was laminated after forming the acrylic resin layer containing no fluorescent substance.
